

# CFS-2

## CHEM-FEED® Aluminum Duplex Skid System

---

### Features

- > The pre-fabricated design allows for easy installation
- > Strong, lightweight polyester powder coated welded aluminum structure
- > Dual side inlets enable connection of multiple skids to the same inlet
- > Flow Indicator provides a visual indication of chemical movement
- > Optional Flow Verification Sensor for monitoring system

### Highlights

**Piping**

PVC Schedule 80  
(optional CPVC)

**Pressure**

150 PSI  
(10.3 bar)

**Compatibility**

M1, M2, M3, M4,  
MD1, MD3, MC2, MC3

**Frame material**

Powder coated aluminum

**Mounting position**

Floor or wall

**Warranty**

2 Years

<b>Skid</b>	Chemically resistant polyester powder coated 6061 T6 aluminum Welded joint construction
<b>Pump (sold separately)</b>	FLEXFLO® M1, M2, M3 or M4 peristaltic pumps CHEM-FEED® CD1, C2, C3, or CD3 diaphragm pumps
<b>Piping</b>	PVC Schedule 80 (optional CPVC)
<b>Tubing (T)</b>	Reinforced braided PVC, 200 Psi max, meets NSF std. 51. The pump inlet and outlet flexible tubing connections are terminated to half unions and secured to the barbed fitting with stainless steel clamps. The calibration cylinder fill
<b>Tubing Clamps</b>	300 series SS band, 400 series SS screw
<b>Unions (U)</b>	PVC body, schedule 80, FKM seals
<b>Ball Valves (V)</b>	Vented type ball, True unions, PVC body, PTFE shaft bearings and seats, FKM seals
<b>Pressure Relief Valve (PRV)</b>	PVC body, PTFE primary diaphragm seal. Non-wetted components: FKM secondary seal, zinc plated steel spring, stainless steel external hardware, HDPE pressure adjusting screw and locknut. Infinite adjustment from 5-100 psi. Maximum inlet pressure 150 psi.
<b>Calibration Cylinder (CC)</b>	PVC body, PVC end caps, 1/4" ID tubing outlet vent. Available volumes: 1.6 GPH (100ml), 4 GPH (250ml), 8 GPH (500ml), 16 GPH (1000ml), 32 GPH (2000ml).
<b>Pulsation Dampener (PD)</b>	CPVC body, 10 cubic inch volume, FKM bladder (optional EPDM bladder)
<b>Gauge W/Guard (G)</b>	Gauge: liquid filled stainless steel with blowout plug, bottom mount, 1/4" NPT threads. Available pressure ranges: 0-30 psi, 0-100, psi, 0-200 psi. Guard: PVC body, FKM diaphragm seal, temperature compensated oil filled.
<b>Check Valve (CV)</b>	PVC body, FKM diaphragm (optional EPDM). Cracking pressure: 1.0-1.5 psi. Maximum working pressure: inlet = 150 psi, back = 100 psi.
<b>Flow Indicator (F)</b>	Machined cast acrylic, PVC connections, ceramic ball, polypropylene ball stop, PVC half unions, FKM seals (optional EPDM)
<b>Y Strainer (S)</b>	PVC body, FKM seals (optional EPDM)
<b>MS6A Chemical Flow Meter (FVS)</b>	PVDF & PEEK body, PVC socket weld connections, FKM seals (optional EPDM). Available working flow ranges: 10-5,000 ml/min (0.158 - 79.2 GPH) 100-10,000 ml/min (1.58 - 158.0 GPH)
<b>Universal Mounting Blocks</b>	PA12
<b>Pump Extended Mounting Brackets</b>	316 Stainless Steel
<b>Skid Mounting Foot Pads</b>	316 Stainless Steel
<b>Mounting Hardware</b>	18-8 Stainless Steel
<b>Drip Tray</b>	Polypropylene, 16" x 21" x 3" - 8 gallons (30.3 L) total containment
<b>Maximum Working Pressure</b>	150 psig (10.3 bar)
<b>Operating Temperature</b>	14 °F to 115 °F (-10 °C to 46 °C)
<b>Approximate Shipping Weight</b>	70 lb. (31.8 Kg)

## Dimensions

Dim	Inch	cm	Dim	Inch	cm
A	36.25"	92.10	E	22.75"	57.80
B	39.75"	101.00	F	24.00"	61.00
C	30.75"	78.10	G	6.00"	15.20
D	35.00"	88.90	H	2.50"	6.40

## CHEM-FEED® Engineered Skid System Model Number

<b>CFS-2</b>	Dual pump system - single chemical / single outlet										
<b>Piping / Valves / Unions / Seal Materials</b>											
<b>A</b>	PVC piping, 1/2" OD PVC braided tubing connections					<b>E</b>	CPVC piping, FKM seals, 1/2" ID PVC braided tubing connections				
<b>B</b>	CPVC piping, 1/2" OD PVC braided tubing connections					<b>F</b>	CPVC piping, EPDM seals, 1/2" ID PVC braided tubing connections				
<b>C</b>	PVC piping, 1/4" ID polyethylene tubing connections					<b>G</b>	CPVC piping, FKM seals, 1/4" ID Polyethylene tubing connections				
<b>D</b>	PVC piping, EPDM seals, 3/8" OD Polyethylene tubing connections					<b>H</b>	CPVC piping, EPDM seals, 1/4" ID Polyethylene tubing connections				
<b>X</b>	Skid frame only without piping										
<b>Chemical Feed Flow Meter</b>											
<b>A</b>	Model MS612 chemical feed flow meter with meter mount display, 10-5,000 ml/min (0.158 - 79.2 GPH)										
<b>B</b>	Model MS622 chemical feed flow meter with meter mount display, 100-10,000 ml/min (1.58 - 158.0 GPH)										
<b>C</b>	Model MS611 chemical feed flow meter with remote display, 10-5,000 ml/min (0.158 - 79.2 GPH)										
<b>D</b>	Model MS621 chemical feed flow meter with remote display, 100-10,000 ml/min (1.58 - 158.0 GPH)										
<b>X</b>	None										
<b>Calibration Cylinder</b>					<b>PVC</b>		<b>Glass</b>				
<b>A</b>	32 GPH (2000 ml)				<b>A</b>						
<b>B</b>	16 GPH (1000 ml)				<b>B</b>		<b>P</b>				
<b>C</b>	8 GPH (500 ml)				<b>C</b>		<b>Q</b>				
<b>D</b>	4 GPH (250 ml)				<b>D</b>		<b>R</b>				
<b>E</b>	1.6 GPH (100 ml)				<b>E</b>		<b>S</b>				
<b>X</b>	None										
<b>Pulsation Dampener</b>											
<b>A</b>	10 cubic inch, CPVC body, PTFE diaphragm						<b>X</b>	None			
<b>Pressure Gauge w/Guard</b>											
<b>A</b>	200 PSI gauge, PTFE diaphragm					<b>C</b>	30 PSI gauge, PTFE diaphragm				
<b>B</b>	100 PSI gauge, PTFE diaphragm					<b>X</b>	None				
<b>Miscellaneous Options</b> (leave blank if not specified)											
<b>A</b>	Isolation ball shut-off valves at check valves										
<b>2</b>	Install two specific pump models on the skid and perform pressure and fluid testing										
<b>R</b>	Outlet plumbing and calibration column position switch										
<b>CFS-2</b>	<b>A</b>	<b>A</b>	-	<b>A</b>	<b>A</b>	<b>A</b>	<b>A</b>	-	<b>A</b>	<b>Sample Model Number</b>	

**NOTE:** All skid systems ship with the following in/out union connections: 1/2" PVC female NPT, 1/2" PVC slip glue.
